TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, C#, Python, SQL, HTML5, SCSS
Frontend Ecosystem:	Angular (v12–v21), React (v18), Angular Material, RxJS, Component Libraries
Backend & Cloud:	.NET Core, REST APIs, Microservices, Node.js, Entity Framework (EF Core)
Databases & Search:	SQL Server, PostgreSQL, Elasticsearch, MongoDB
Tools & Practices:	Data Structures & Algorithms (100+ LeetCode), Git, System Optimization, CI/CD

PROFESSIONAL EXPERIENCE

Senior Software Engineer — PAIX Services
Apr 2026 – Present

- Architected enterprise-grade full-stack healthcare platforms using **Angular, TypeScript, and C# .NET Core microservices**, standardizing reusable shared component libraries across multi-tenant modules.
- Engineered **RESTful APIs and EF Core data pipelines** to streamline distributed frontend-backend integration, ensuring high data accuracy and sub-second transaction response times.
- Developed centralized **Patient Dashboard & Clinical Visit History** workflow engines, giving practitioners real-time, consolidated access to critical healthcare records.
- Automated **Lab Order Management workflows** (validation, tracking, and asynchronous service calls), eliminating manual data errors and boosting clinical operational efficiency.

Software Engineering Senior Associate — Dedalus
Jun 2023 – Apr 2026

- Engineered and scaled a UK-based enterprise **Laboratory Information Management System (LIMS)** using Angular v21, TypeScript, C#, and SQL, automating sample tracking and clinical workflows to ensure zero data corruption.
- Spearheaded enterprise Angular framework migrations from **v12 to v21** across core modules, refactoring legacy architecture with zero downtime and improving build pipeline velocity.
- Optimized critical system latencies by implementing **UI/server-side caching and API response compression**, slashing page load times from **4s to 300ms (92% reduction)**.
- Led a team of 12 developers across 2 full sprint cycles and directly mentored 8 engineers on clean code practices, reactive programming (RxJS), and maintainable architecture.
- Awarded the **"Achieve Excellence Together" award 3 times** for exceptional engineering contributions and high delivery standards.

Software Engineer — Boodskap Labs
Aug 2021 – May 2023

- Architected **20+ reusable, responsive UI components** and integrated Monaco Editor/Tree tooling to build robust, IDE-like interfaces, accelerating team feature delivery by **40%**.
- Migrated application data access tier from Elasticsearch to structured SQL, optimizing query execution plans and drastically reducing query complexity.
- Implemented decoupled state management services leveraging RxJS streams to improve overall frontend application stability and memory footprint.

Frontend Developer — Mirror Technologies
Jul 2020 – Aug 2021

- Delivered end-to-end client-facing web applications using JavaScript, HTML5, and CSS3, managing technical requirements from initial scoping to production launch.

KEY PROJECTS & ENTERPRISE SYSTEMS

Enterprise Healthcare Core & Clinical Portals (PAIX & Dedalus): Developed mission-critical healthcare workflows including Patient Dashboards, Lab Order Management, and UK-compliant LIMS platforms using Angular v21, C# .NET Core microservices, and EF Core, optimizing clinician data access and automated sample tracking.

DTA-HIP (Mass. Public Assistance Platform): Contributed to a secure US state government program application facilitating healthy food incentive tracking, utilizing Angular, Node.js, TypeScript, and REST APIs.

EDUCATION & ACHIEVEMENTS

Bachelor of Engineering (B.E.) in Electronics and Communication — Chennai Institute of Technology
CGPA: 7.0 | 2016 – 2020

• **Problem Solving:** Solved 100+ Data Structures & Algorithms (DSA) problems on LeetCode.
